

POS Displays

IEE offers the most current display and display interface technologies available to satisfy any POS requirement.

VFD Pole Displays

Powered through a serial interface or a USB, our VFD displays save space and simplify installation. They replace many OEM-supplied products, including Epson, IBM, Logic Controls, Partner Tech and Ultimate.

VFD Graphic Pole Displays

These displays feature crisp, bright readable symbols, graphics, text and numerical information, as well as incorporating multiple language fonts.

LCD Pole Displays

LCD wide angle displays use less power, are sunlight readable and offer outstanding service life.

Countertop Displays

Standard kits containing the filter, housing, power supply and mounting options convert all our VFD displays to countertop configurations.

Commitment to Quality

Our goal is to exceed our customers' expectations. We have invested heavily in a state-of-the-art development, testing and manufacturing facility as well as in our people, who constantly receive rigorous training to keep ahead of the technology curve.

The quality and integrity of our products are maintained through an in-house management and control system that spans our entire process from conception to delivery.

Our certification standards include:

- ISO 9001:2008
- Workmanship standards: IPC-A-610 and ANSI/J-STD-001
- Total quality environment, SPC, continuous improvement
- Certifications: NRTL, UL, FCC, uTUVus, CSA and CE

Real Solutions for Retail Applications

POS Displays To Enhance Your Customers' Experience

Real Solutions for Retail Applications

IEE's legacy began in 1946 with the company developing and manufacturing cutting edge military defense displays for United States government aircraft, naval and land vehicles. Today we remain a leader in safety-critical military displays, and have successfully applied this expertise to our POS products for retail applications.

Our products are reliable, durable and designed specifically to provide cost-effective solutions for the retail environment. IEE offers the most current display and display interface technologies available to satisfy any POS display requirement.

With design, development, manufacturing and test facilities housed in our Van Nuys, California headquarters, IEE is uniquely positioned to provide solutions that enhance your customers' experience.

POS Scanners

ScanVue™ Full Featured POS Scanner

Designed with superior ergonomics in mind, the dependable and durable ScanVue is our best seller.

ScanVue key features:

- Omnidirectional scanning
- Rapid price verification of bar-coded merchandise
- 5.7" QVGA display
- Easy-to-use menu-driven navigation
- Ethernet and 802.11b RF models

Coming Soon...
ScanVue-2D™:
slimmer, faster, 1D & 2D scanning!

ScanVue Value+™ Price Verifier

Our low-cost, high performance verifiers allow your customers to easily verify the price of bar-coded merchandise. The bright, easy-to-read display provides four lines of text for item description and price as well as promotional information.

- Competitively priced
- Bright, easy-to-read 4X20 VFD display
- Standard power over Ethernet (optional power supply available)
- Meets local legislative item-pricing requirements

Outdoor Kiosk Displays

IEE is the technology leader in outdoor kiosk display solutions. Our displays can be found at ATMs, amusement parks and sporting events as well as on toll roads.

- Touch screens
- Sunlight readable
- 3.5" to 19" displays

3D Technology!!

IEE now brings best-in-class imaging to POS displays with 3M's revolutionary 3D film technology that eliminates the need for special glasses.
